

# How We Make Replacement Slings

ChairCarePatio.com

At Chair Care Patio, we have been making replacement slings for better quality patio furniture for over 20 years. We have new slings down to a science. On average, we make close to 20,000 new replacement slings each year. The best time to order is in the Fall and Winter when lead times are best. During peak season, lead times average 8-10 weeks due to the high volume of orders all at one time.

1

Every replacement sling we make is custom cut to your specific measurements.

2

After the custom cutting process, replacement sling orders travel to the sewing staff.

3

Replacement slings are sewn on all 4 sides. We use a double needle stitch to keep the seams secure.

4

Once sewn, replacement sling orders head to the shipping department. New sling spline or rod is added to each order.

5

Replacement sling orders are boxed. During peak season we can ship over 1000 replacement slings in a day!

6

Our UPS guy loves to fill up his truck with our boxes. On busy shipment days, we always help him load the brown truck.
